

A technical drawing of a mechanical assembly, likely a pump or valve mechanism, shown in a cross-sectional view. The assembly consists of several components labeled with numbers 1 through 10. Component 1 is a flange or mounting plate on the left. Component 2 is a shaft or rod passing through the flange. Component 3 is a nut or washer on the shaft. Component 4 is a housing or cover with a flange. Component 5 is a seal or gasket between components 4 and 6. Component 6 is a central body or cylinder. Component 7 is a handle or lever attached to the bottom of component 6. Component 8 is a conical or tapered part. Component 9 is a rectangular block or housing. Component 10 is a lever or handle attached to the right side of component 9. The drawing uses dashed lines to indicate internal features and hidden parts.

FIG. 2 is a perspective view of the assembly 10. It shows the container 11, the sleeve 9, and the cap 8. The cap 8 is shown with the cap member 12, which is a series of parallel lines forming a cap-like structure. The sleeve 9 is shown with a dashed line indicating its internal structure. The container 11 is shown with a dashed line indicating its internal structure.
